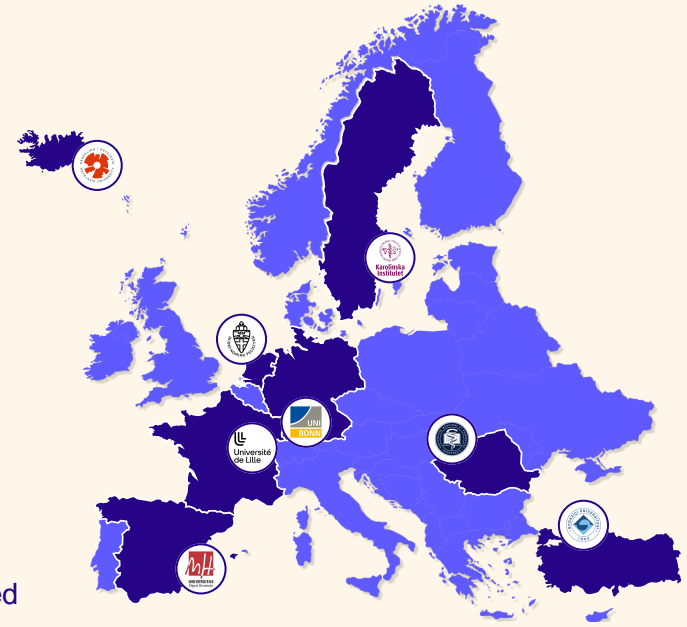
We are NeurotechEU

The European University of Brain and Technology

Wij zijn NeurotechEU, Somos NeurotechEU, Vi är NeurotechEU, Wir sind NeurotechEU, Biz NeurotechEU'yuz, Suntem NeurotechEU, Mi vagyunk a NeurotechEU, Nous sommes NeurotechEU, Við erum NeurotechEU



Technologies from, for, and with the brain

NeurotechEU represents a European alliance of eight universities with a focus on neurotechnology.

By building a trans-European network of excellence in brain research and technologies, NeurotechEU increases the competitiveness of European education, research, economy, and society.

Why Neurotechnology?

Neurotechnology is an emerging scientific field focused on developing a broad range of methods, concepts, artificial systems, and technologies aimed at understanding, interacting with, repairing, enhancing, and directly influencing the brain and human behaviour.

8 Dimensions of NeurotechEU

The 8 dimensions of NeurotechEU are interdisciplinary fields that aim to understand and influence the brain and behavior through technology. These dimensions support innovation and bridge different disciplines to advance neurotechnology research, education, and application.

The 8 dimensions are:

1. Empirical and clinical neuroscience
2. Theoretical neuroscience
3. Neuromorphic computing
4. Neuromorphic control /Neurorobotics
5. Neuroinformatics
6. Neuroprosthetics
7. Clinical neurotechnology
8. Neurometaphysics

Giada Longa
Student from the NeurotechEU student council

"United in diversity, the European Union stands as a testament to the power of cooperaation over conflict, solidarity over division, and progress over stagnation. In aligment with these principles, NeurotechEU also upholds these values and objectives, fosterin collaboration, solidarity, and progress in the field of neurotechnology"

Co-funded by the Erasmus+ Programme of the European Union

Opportunities in neurotechnology for students transcending borders in Europe

NeurotechEU partner training

Students can apply to bachelor's, master's, or doctoral courses in neurotechnology at the partner universities.

Participate in research

Students can focus their thesis or dissertations on NeurotechEU research areas and seek advisors involved within the network.

Mobilities across Europe

Students can apply to activities held by the different allied universities, having the opportunity to visit the different countries involved and the other members of the alliance.

Extracurricular activities and events

Students can expand their knowledge, network, and gain expert feedback on their work through NeurotechEU's conferences, workshops, and team projects.

Transcending the borders

NeurotechEU works within different European and global cultures, in different languages, and across borders, sectors and academic disciplines, through all levels (bachelor's, master's, doctoral, lifelong learners, and researchers).

223 k + students

23 k + staff

200 + joint grants

5,500 + joint publications

Student Council

Represents students' opinions and interests across NeurotechEU.

Facilitates exchanges of knowledge and experiences between students within academia, industry, and society.

Assist with skill transfer that enables open discussion and collaboration.
